This report is the international pre Authority under Article 35 and tree			nis International Preliminary Examining	
2. This REPORT consists of a total	of 5 sheets	s, including this cove	er sheet.	
3. This report is also accompanied by	y ANNEXES, comprising	•	·	
a. (sent to the applicant	and to the International l	Bureau) a total of	sheets, as follows:	
sheets of the and/or sheets	description, claims and/or containing rectifications	drawings which hav	we been amended and are the basis of this report uthority (see Rule 70.16 and Section 607 of the	
•	e Instructions).		the state of the s	
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.				
b. (sent to the Internation	onal Bureau only) a total c	f (indicate type and	number of electronic carrier(s))	
			g and/or tables related thereto, in computer	
readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).				
4. This report contains indications relating to the following items:				
Box No. I Basis of	f the report			
Box No. II Priority				
Box No. III Non-est	tablishment of opinion wit	h regard to novelty,	inventive step and industrial applicability	
Box No. IV Lack of	unity of invention			
	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement			
	documents cited	anono capporning sa		
Box No. VII Certain defects in the international application				
Box No. VIII Certain observations on the international application				
Date of submission of the demand		D-1C 1	CALL

Box	No. I	Basis of the report
1.	With r	egard to the language, this report is based on the international application in the language in which it was filed, unless rise indicated under this item.
		This report is based on a translation from the original language into the following language which is the language of a translation furnished for the purposes of:
		international search (under Rules 12.3 and 23.1(b))
		publication of the international application (under Rule 12.4)
		international preliminary examination (under Rules 55.2 and/or 55.3)
2.	furnisi	regard to the elements of the international application, this report is based on (replacement sheets which have been hed to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" re not annexed to this report):
ŀ	\boxtimes	the international application as originally filed/furnished
1		the description:
		pages as originally filed/furnished
1		pages* received by this Authority on received by the r
		the claims:
	Ш	pages as originally filed/furnished
		pages* as amended (together with any statement) under Article 19
		pages* received by this Authority on
		pages* received by this Authority on
		the drawings:
		pages as originally filed/furnished
		pages* received by this Authority on
		pages* received by this Authority on
		a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing.
3.		The amendments have resulted in the cancellation of:
		the description, pages
		the claims, Nos.
		the drawings, sheets/figs
		the sequence listing (specify):
,		any table(s) related to the sequence listing (specify):
4.		This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).
		the description, pages
		the claims, Nos.
		the drawings, sheets/figs
		the sequence listing (specify):
		any table(s) related to the sequence listing (specify):
*	If item	4 applies, some or all of those sheets may be marked "superseded."

2. Citations and explanations (Rule 70.7)

The following documents are cited in the International Search Report:

D1: US 2003/0013704 A1

D2: US 6492355 B1

D3: US 2001/0003121 A1

D4: US 6201024 B1 D5: US 6242470 B1

The present application relates to adamantane derivatives of formula (I), processes for their preparation, pharmaceutical compositions containing them, a process for preparing the pharmaceutical compositions and their use in therapy. The problem solved by the present application according to claims 1-18 is to provide compounds effective as P2X₇-receptor antagonists for use in the treatment of inflammatory, immune or cardiovascular diseases.

D1, which represents the closest prior art, discloses adamantane derivatives, their preparation, pharmaceutical compositions containing them, a process for preparing the pharmaceutical compositions and their use in therapy. The adamantane derivatives are used as P2X₇-receptor antagonists i.e. in the treatment of inflammatory diseases.

Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of: BOX V

Claim 1 of the present application differs from D1 in that the hydroxyl group close to the amine group in claim 1 is absent in the structure of D1 (page 1, passages [0008]-[0009], R⁴). The compounds are structurally similar and have similar effect (examples 3-4, 6-7 11-12 and 14; page 6 passage [0146] and page 33 passage [0543] of D1). The problem to be solved by the present invention may therefore be regarded as finding new compounds for use in medicaments for the treatment of the diseases mentioned in the application. It is considered obvious for a person skilled in the art with knowledge of D1 to place a hydroxyl group at this position. Thus, claim 1 lacks inventive step.

Documents D2-D5 show similar compounds having the same field of application.

In order to justify the patentability of the present subjectmatter, the technical effect of the claimed compounds must be This can, for example, be done by comparative experiments, showing that the compounds according to claim(s) have such unexpected and beneficial effects, compared to the previously known similar compounds, that they can be considered to differ essentially from said compounds. In order for a compound to be considered patentable, this difference must be shown to result in a novel and unexpected technical effect. The applicant has not indicated any difference in to prior art and the significance of relation difference for the whole of the scope of the claims.

The compounds, products and processes claimed in dependent claims 2-18 do not differ significantly from what is previously known from the cited documents. Thus, these claims lack inventive step.
